PROFESSIONAL SUMMARY

I am a Senior Product Designer and Design Lead with 6 years of experience building high-trust digital financial products across mobile and web. Progressed into design leadership at Interswitch, leading the Mobile Financial Services design portfolio across major banking and white-label financial products. Led the end-to-end design for Zenith Bank and FirstBank mobile banking platforms, now live, while overseeing design delivery across a white-label portfolio serving 15–20 microfinance banks. Strong in product strategy, design systems, user research, and translating complex business and technical requirements into scalable experiences.

SKILLS AND TOOLS

- **Product Design:** Product Strategy · User flows · Information Architecture · Wireframing · Prototyping · Interaction Design · End-to-End UI/UX
- **Design Leadership:** Design Leadership · Design Reviews · Design QA · DesignOps · Design Systems · Stakeholder Management · Cross-functional Collaboration · Team Oversight
- **Research & Data:** User Research · Usability Testing · Product Analytics · Data-Informed Design · A/B Testing · Data Analysis & Visualization · Journey Mapping · Competitive Analysis
- **Visuals & Systems:** Visual Design · Typography · Layout & Hierarchy · Design Tokens & Variables · Reusable Components · Micro-interactions
- **Tools:** Figma · FigJam · Figma Make · Jira · Miro · Maze · Slack · Google Workspace · Claude · Jupyter

EXPERIENCE

Product Design Lead – Mobile Financial Services

Interswitch Group | February 2024 - Till Date

Role Objective: Lead design for the Mobile Financial Services (MFS) portfolio, providing product design direction, design quality oversight, and cross-functional leadership across banking and financial-services products.

Zenith Bank Mobile Banking Application:

- Led the end-to-end redesign of the mobile banking app, owning the design system, core banking journeys, and new features including Pan African Payment and Settlement Scheme(PAPSS), USD

Pensions Remittance, Single Device Binding, Dangote IPO, Contactless Payments, and other digital banking features.

- Owned the redesign and launch of the Zenith Bank mobile app, contributing to over 15M downloads and a 3.8 rating from 51.7K+ reviews on Google Play, alongside a 3.5 rating from 867 ratings on the Nigerian App Store
- Simplified key banking journeys and improved navigation, contributing to a 20% increase in money-transfer completion, and 40% increase in bills payment adoption..

First Bank Mobile Banking Application (FirstMobile):

- Led design of digital banking experiences across the Convert FX, Dangote IPO, Lifestyle Services, QR ATM Withdrawal, Buy Now Pay Later, and other features, taking products from concept through launch.
- Designed and launched the new app features, contributing to 10M+ downloads of the FirstMobile and a 4.0 rating from 93K+ reviews on Google Play, and a 2.9 rating from 6.2K ratings on App Store.
- Improved product usability by simplifying banking workflows, driving 40% adoption of Convert FX and 15% adoption of the Buy Now, Pay Later (BNPL), while streamlining self-service features to make everyday banking faster and easier.

White-Label Financial Services:

- Manage 3 product designers, establishing weekly design reviews and Design Quality Assurance processes while partnering with engineering to maintain design integrity and high-fidelity execution across mobile banking products.
- Oversee design delivery across a white-label digital banking portfolio serving 15–20 MicroFinance banks(Bank of Industry MFB, Leadcity MFB, Uhuru MFB, FINCA MFB, TAJ Bank, among others) providing design direction, reviews, and quality oversight across multiple financial-institution implementations.
- Design and review white-label financial products, developing reusable patterns and scalable systems that improved consistency, streamlined product adaptation, and maintained a cohesive experience across implementations.

Product Designer – Mobile Banking and Payment Platform

Interswitch Group | May 2022 – January 2024.

Role Objective: Design seamless financial products that simplify complex workflows, improve adoption, and support business growth through research, analytics, and scalable design systems.

- Designed the end-to-end experience for a mobile Point-of-Sale (PoS) solution for underserved and unbanked merchants, simplifying onboarding, KYC, and transaction flows through user research, usability testing, and iterative design.
- Designed and iterated on Smart ID, a financial card and PIN issuance solution, simplifying complex workflows and improving operational efficiency for financial institutions.

- Led the design of “Request PoS” on Quickteller Paypoint, collaborating cross-functionally from ideation to implementation; achieved 40%+ conversion post-launch, contributing to increased adoption and business ROI.
- Leveraged product analytics, user research, usability testing, and design systems to identify friction points, validate solutions, inform product strategy, and establish reusable design patterns across experiences.

Product Designer – Financial API Platform

Condueet | January 2022 – April 2022

Role Objective: To design simple web experiences for a financial API platform that connects banks with businesses across Africa.

- Redesigned the landing page and core web experience through data-informed design iterations, contributing to a 70% user conversion rate.
- Designed the onboarding and dashboard experience for an aggregated API platform, simplifying complex data streams and workflows for third-party developers and business accounts.
- Conducted competitor analysis and market research to identify opportunities and inform product improvements
- Collaborated with stakeholders to define product requirements and translate business objectives into intuitive user experiences.

Product Designer – Automated Payment Platform

Repeefy | November 2020 – January 2022

Role Objective: To design an intuitive financial product through user-centered design, data-driven insights, design systems, and close collaboration with the engineering team.

- Designed user flows and interfaces for automated payment products and financial workflows.
- Contributed to the design system documentation and maintenance, establishing component consistency and standardized Figma file organization.
- Collaborated closely with developers throughout implementation, communicating design decisions and supporting scalable product delivery.
- Conducted usability testing and A/B experiments to identify opportunities for improving product performance and user experience.
- Contributed to data analysis and visualization to support product and project objectives.

EDUCATION

Bachelor of Engineering in Electrical and Electronic Engineering (Second Class Upper)

Federal University of Technology Owerri, Imo State, Nigeria, 2015 – 2021

CERTIFICATIONS:

- **Design Composition** | Uxcel
- **UI Components I & II** | Uxcel
- **UX DesignOps** | LinkedIn Learning
- **Hands-on with Design Systems** | LinkedIn Learning
- **Building Trust Through UX Design** | LinkedIn Learning
- **Design Powered By Data** | LinkedIn Learning
- **User Interface/Experience Design** | Perxels Design School
- **Artificial Intelligence & Data Science** | Data Science Nigeria

COMMUNITY & VOLUNTEER EXPERIENCE

Product Design Mentor

Nigercare Development Aid International (NDAI) | October 2021 - November 2021

- Volunteered to empower young girls with foundational product design skills and introduce them to opportunities in technology and digital product development.

Technical Writer

Educative Community | December 2021 - June 2023

- Published articles simplifying technical concepts across UX design, Web3, and blockchain for a technical learning community.
